## What's "Affiliate"?

The term "affiliate" is a frequently used term in internet advertising. It is a system whereby if the introduction of a product or service on a website, such as a blog, is successful (e.g. a user purchases the product), the operator of the website receives a reward.

## What's "Non-virtual affiliate"?

Non-virtual affiliate is an internet advertising system as applied to cellphone shops as physical locations. Under this system, cellphone shops encourage customers visiting them to subscribe to particular content, and if a customer actually subscribes to the content, the cellphone shop receives a reward.
